

Information Sheet

Pocket Toner® NX8 Voice & Video Pro Kit

Advanced multi-line identification and testing for coaxial cable and telephone

What's In the Kit:

- | | |
|---------------------------------|---------------------------------------|
| Pocket Toner® NX8 | F-female coupler (F-81) |
| 8 ID caps | F-male coupler (F-71) |
| 66 block adapter | F-female coupler (<i>Speed 81™</i>) |
| 8 RJ-11 adapters | F-male push-on adapter |
| Dial Tone Detective™ | AAA battery |
| Alligator clips & RJ-11 adapter | Deluxe case with belt clip |

When it comes to high production in testing both TV and telephone jacks, this kit has the ability to test multiple voice and video jacks all at the same time making this the ultimate "Triple Play" kit! The exciting Dial Tone Detective™ (DTD) used to detect the presence of dial tone and proper polarity on voice jacks, is also included in this kit.

PTNX8 is the best tone and tag tool for testing continuity, shorts, 50-75 Ω termination, and polarity—on eight cables at once! Simply place each of the numbered ID caps on the remote ends of the cables to test. Then, quick-connect the main unit to the other end of the test cables one at a time. If there is continuity, the green LED on the ID cap will light and the main unit will show the ID cap's number (1-8) on its digital display. In addition, the audible indicator in the main unit will emit a brief tone. PTNX8 also tests for and displays the presence of AC or DC voltages from 6v-48v.

FEATURES

- Low-voltage circuit protection (6v -48v) in main unit, toner unit & ID caps
- Patented Gale Corporation adapters to test any wire or cable
- 8-Segment LED displays 5 different test results
- Audible indicators in both Main Unit & detachable Toner Unit
- LED indicators on all ID caps indicate continuity
- Main Unit "beeps" when line condition changes
- Test up to 8 cables at once
- Bi-gender Toner Unit w/removable Speed 81™ coupler
- Removable push-on F-type connector
- Nickel-plated brass connection fittings
- Lightweight and durable, anodized aluminum construction
- Push-button power switch w/dust seal
- Auto shut-off feature extends battery life
- Key high-wear parts are replaceable
- Uses 1 standard AAA battery
- One-year limited warranty
- One-year warranty

Test Result Display	
	Blinking [-] indicates an open circuit
	Blinking [5] indicates a short
	Solid [7] indicates continuity with either a 50-75 ohm ID cap or the toner unit
	A solid matching number indicates continuity with one of the 8 ID caps
	Blinking [⚡] indicates AC voltage (>6 volts)
	Solid [⚡] indicates DC voltage (>6 volts)
